

Where am I needed?

Here comes my harvest
On the crest
Of a wave
Of us all being brave
Meeting in meaningful ways
The room buzzing
With Checking in
To find out
Where we are
Have we traveled far
From 2 days ago 'til now?
Can I see
Internally
What is needed of me?
What do I feel and think
On the brink
Of this sustainable food work
I am being called to do
Connecting my deeper knowing
Deeper growing
Deeper wisdom flowing
From the head and heart
We start
From a group
Using our energy to find the focus and precision
Of decision
Today is the day
For deep listening
So I can share
Story and substance
So I am not alone
In believing this type of experience is possible
I need to understand
Shift from doubt to trusting this is possible
Sustainable
In the face of corporate extraction
“I don't know if this is possible” is my reaction
My attitude must shift
Uplift
To show leadership in our own organizations
And here in the lab as a catalyst
So nothing is missed
And information is shared
So we do not think we have the only truth

Only together can we blow off the roof
Speaking up as an operator
And a leader sharing a important piece
Release
Inhibition
Being more aggressive to get impact on communication
To build relation
So we can remain together
Is there a need for an external communication strategy?
No need for us to feed
We be getting thinner
Missing dinner
We are ready to hear
Come and find us – be clear!
Sharing knowledge and adding to the group
Feeding the loop
Of our collective knowing
Growing
Energy flowing
Then we hit the money
The funny
Block
How about we go through
A U
To get clear
Beyond Fear
To come to a different place of thinking
So our ships don't get to be sinking
From worry about cash
We'll get richer by not
Not being scared of the bigger picture
Just taking the next step in our power
Under the enormity
We are shattering the conformity
Creating the new
The few
Grounded
In personal commitment
And personal gift
That's the place of the first shift
